Library Research and Subject Guides Mobilized

By Rebecca Raszewski

Need to use library resources on the go? UIC Library Research and Subject Guides are now more accessible on your mobile device. Point your mobile device to researchguides.uic.edu or researchguides.uic.edu/mobile.php. Guides can be browsed by author, subject, the most popular, or the most recent.

There are several library resources that can be accessed through apps or mobile websites. Take a look at our Mobile Medicine guide:

This guide can be found at: http://researchguides.uic.edu/MobileMed

It provides instructions on accessing or downloading these resources or to see which resources are compatible with your devices.
